

ERGONOMICS MATTER

Whether customers are working remotely or in the office, a properly designed workspace can massively improve their long-term comfort, while a poor one can result in pain, fatigue, and sometimes even debilitating repetitive strain injuries.

The right ergonomically designed PC accessories can make all the difference. Meeting a range of needs, from how people sit, to how they type, swipe, point, and click, they could be the ideal solution for customers looking to improve the overall wellbeing of their staff.

This short guide will introduce a range of Microsoft Ergonomic accessories, and why they're the right solution for healthier working.

MICROSOFT BLUETOOTH® ERGONOMIC MOUSE

Microsoft has combined breakthrough ideas in mouse comfort, in order to create a better all-round design that helps get the sensitive area of the hand away from an abrasive work surface.

- Designed to support the hand and provide just the right amount of surface area for the palm and fingers to rest comfortably.
- Height and shape are designed to position the wrist and hand to reduce pressure on the carpal tunnel.
- Slant promotes a neutral, relaxed posture for the wrist and forearm.
- Thumb rest guides the hand into the correct position and helps maintain it while using the mouse.

Microsoft Sculpt Comfort Mouse

MICROSOFT ERGONOMIC KEYBOARD

Microsoft offers a variety of ergonomic keyboards designed to suit various preferences in terms of size, shape, and configuration.

- Split design helps to position wrists and forearms in a natural, relaxed position.
- Large size keeps the shoulders separated and improves posture.
- Wired connectivity ensures reliability and speed from a home or office.
- Function keys ensure extra features are just one touch away.
